

2023: the 50th Anniversary of Metabolic Control Analysis

- 2023 will be the 50th anniversary of the publication in 1973 of the papers by Kacser & Burns and Heinrich & Rapoport that led to the emergence of Metabolic Control Analysis as a distinct field.
- To mark the occasion, **BioSystems** has agreed to host a special issue of papers describing current applications of MCA in the biological sciences, biotechnology and medicine. See: <https://www.sciencedirect.com/journal/biosystems/about/forthcoming-special-issues> for further details and instructions. Additional background is given at <https://mudshark.brookes.ac.uk/MCAat50>
- Contributions are invited when submissions open in November 2022 until January 2023 via the [Editorial Manager portal](#).
- The Guest Editors for the Special Issue are David Fell, Johann Rohwer and Emma Saavedra. Could intending authors please notify them with an outline of their intended contribution before submission so that they can attempt to ensure that the Special Issue has representative coverage of the field.
